

---

For its new cogeneration plant located in the Kaiserbaracke industrial estate in Amel, RENOGEN is looking for

## ***Skilled operator***

### Job description:

The operator is responsible for the day to day checking of the proper functioning of the boiler and auxiliary systems, for the detailed reporting of actions, for the water sampling and for the actions to implement for proper devices operation.

The operator is able to operate the process and maintenance of the plant and works according to established health and safety instructions.

Together with another operator and the plant manager, the operator will keep the plant running efficiently in order to give complete satisfaction to our customers. To this extent, the operator will actively participate to the upkeep of the plant.

### Your profile:

- Punctual, reliable, team player, objective oriented
- Technical education
- A few years experience with maintenance of industrial process installations
- Knowledge of measurement instruments
- Able to read and understand technical documentation
- Knowledge of mechanics, electricity, PLC and process automation
- Excellent in English both verbal and writing
- German and Dutch languages interest
- Interested by learning new languages and processes and by experience abroad
- Living nearby our plant facility (Amel, Belgium)

### We offer:

An international and multi-lingual working environment in an organization with an ambition to grow in Belgium and abroad

An open and pleasant working environment

An interesting remuneration
